Section 5 Fire Fighting Methods

Extinguishing Media:

Water fog or fine spray. Dry chemical fire extinguisher. Carbon dioxide fire extinguisher. Foam.

Fire Fighting Procedures:

Keep people away. Isolate fire and deny unnecessary entry. Use water spray to cool fire exposed containers and fire-affected zone until fire is out and danger of re-ignition has passed. Fight fire from protected location or safe distance. Consider the use of unmanned hose holders or monitor nozzles. Immediately withdraw all personnel from the area in case of rising sound from venting safety device or discoloration of the container. Burning liquids may be extinguished by dilution with water. Do not use direct water stream; may spread fire. Hand held dry chemical or carbon dioxide extinguishers may be used for small fires. Move container from fire area if this is possible without hazard. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage.

Special Protective Equipment of Firefighters:

Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire-fighting clothing (includes fire-fighting helmet, coat, trousers, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance.

Unusual Fire and Explosion Hazards:

Container may rupture from gas generation in a fire situation. Violent steam generation or eruption may occur upon application of direct water stream to hot liquids.

Hazardous Combustion Products:

During a fire, smoke may contain the original material in addition to combustion products of varying composition, which may be toxic and/or irritating. Combustion products may include and are not limited to: carbon monoxide, carbon dioxide.

Section 6 Accidental Release Measures

Steps to be taken if material is released or spilled:

Contain spilled material if possible. Collect with vacuum equipment. Collect in suitable and properly labeled containers. Attempt to absorb or neutralize by adding materials such as sand, vermiculite, or soda ash. See section 13, Disposal Considerations, for additional information.

Personal Precautions:

Isolate area. Keep unnecessary and unprotected personnel from entering the area. Spilled material may cause a slipping hazard. Material becomes more slippery when wet. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure controls and Personal Protection. Refer to Section 7, Handling, for additional precautionary measures.

Environmental Precautions:

Prevent from entering into soil, ditches, sewers, waterways, and/or groundwater. See Section 12, Ecological Information, for additional information
